Introduction

Small business modern of the economy main from the supports one is , it is not only entrepreneurship potential done increase , maybe new work places creation , innovation solutions current to grow and economic growth in encouragement important role plays . Small business importance his/her fast flexibility , new markets and opportunities conquest to grow ability , as well as local community to the needs clear answer to give It is possible . Developed and developing in countries small business subjects collar work with employment source is considered , for example , in Uzbekistan small and middle business in subjects total worker 53 % of capacity occupied is , this huge human resources activation shows . From this except , small business gross internal 24.5 % of the product is produced releases , this and his/her national in the economy important place confirms . Small in business work opportunities many in terms of digital of technologies current to be with is expanding , for example , KPI (key performance indicator) performance indicators) systems through processes automation efficiency increase and of employees qualification to increase directed new professions to the surface brings . Also like the Internet of Things (IoT). technological achievements small to business new opportunities creates , for example , operational expenses reduce , productivity increase and new to the markets entrance , this and own in turn new experts , for example , data analysts , IoT engineers and customers with work according to consultants demand does . Small in business work places of creation again one aspect this various in sectors including manufacturing release , service show , village agriculture , transport and in others activity is conducted , for example , in Uzbekistan small business subjects by shown services size , construction jobs , retail trade turnover such as indicators this in the fields employment opportunities shows . New work their places in creation small business role state by support , for example , tax benefits and privileged loans to give such as measures are also important importance has , because this for entrepreneurs own activity expansion and new work their places create for additional resources gives .

Small business Uzbekistan in the economy solution doer role playing in the country collar work provides 74% of the seats and collar internal 54.3 % of the product is produced However , in the field one row serious disadvantages available . Financial difficulties , pledge requirements high was loans , women and youth entrepreneurship of support limitedness main Administrative problems obstacles and complicated

statistics report system entrepreneurs for additional bureaucratic weight creates . Technological in terms of small business still backward in case of enterprises only 15% industry in the field activity runs , artificial intellect such as modern from technologies use low level . Infrastructure problems , especially interregional differences big developed and less developed regions between sharp difference available . Qualified worker power shortage , export of possibilities limitedness and innovative projects shortage again one row is one of the problems . All this shortcomings eliminate to grow for financial help expansion , loans pledge requirements softening , women and youth entrepreneurship for special programs current to grow offer Administrative reforms take go , statistics reports simplification and state services digitization necessary . Technological innovations current artificial intellect and cloudy from technologies use encouragement , as well as infrastructure improvement , especially village transport, internet and energy systems improve necessary . Qualified personnel preparation according to supreme education institutions and entrepreneurship between cooperation on the road export encouragement measures visibility , startup projects financing expansion and innovative ideas support Public , private sector and international partners middle close cooperation through small business potential complete to come true release possible . Conclusion as so to speak , small business not only economic growth important factor , maybe population busyness provide and new work their places also important in creating role plays . Small business enterprises big to enterprises than more to work based is , this to them more work places create opportunity Also , small business enterprises to changes fast adapts and new opportunities is looking for this and new and innovative work of places appearance to be take comes . Small in business work opportunities various kind to be , worker , manager and businessman as activity to conduct opportunities own inside takes . Small in business of work to the advantages flexibility , growth opportunities and personal relationship includes , disadvantages and big work size , less work right and social of privileges limitedness Therefore , small business to develop aimed at politics improvement , population busyness increase and new work places create according to recommendations working exit important importance has . In this small business to oneself typical features into account to take , their problems solution to do and opportunities to expand aimed at measures done increase necessary . Only that's all small business of the economy

important to the driver around , population well-being to increase and of the country world in the market competitiveness to provide worthy contribution add takes .
